Python for Informatics

Assignment 8

"3 Informatics Projects"

Description:

1. Step through and execute each of the three informatics applications/projects delineated in Chapter 15 ("Visualizing data") of our textbook. The slides for Lesson 8 will help you understand the how and why of each necessary step.
2. At the end of each project, take a screenshot of the project output.

Deliverable:

Three files as attachments at our course shell assignment page. Each one will be a screenshot image file (.png or .jpg) demonstrating the final output of the respective project.
